Inspired by curiosity

Seriously, this is why we like our job so much

Since 2015, we have worked on new ways of communicating & new digital solutions. Our approach has always been to explore something different, combining creativity, usability & millions of lines of code with the objective of delivering a unique experience. We strive to do a bit more with every project

We never stop playing

We are a digital creative agency based in Dhaka & Chittagong that approaches each project with the same curiosity we had when we were kids, just with a bit more experience, method & precision. Bee curious, think loud, play fair, share everything

Get closer

Speed dating can be exciting.

But we like long term relationships even more.

No, we didn't read this in a gossip magazine.

To make a relationship last, a strong connection is the key.

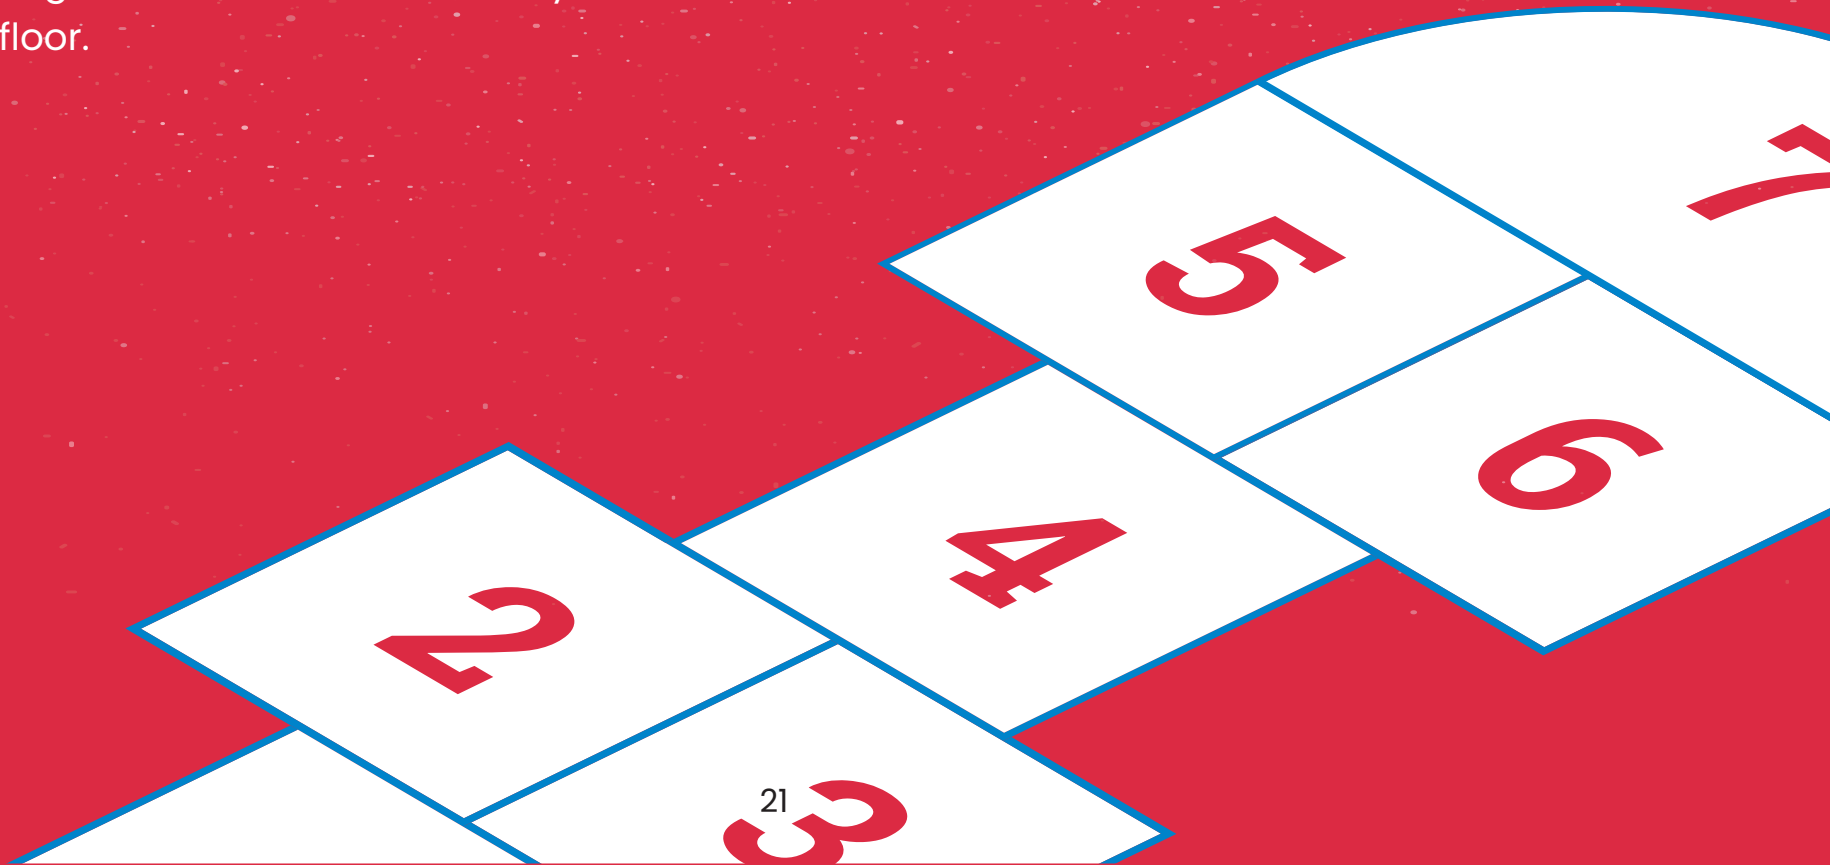

We believe in getting to know each other and building a consistent approach. Taking an in-depth look at the scenario is crucial. That's why we focus on building good relationships with our customers to understand their needs and collaborate on innovation, strategy, and brand culture. Our goal is to add value through measurable objectives.

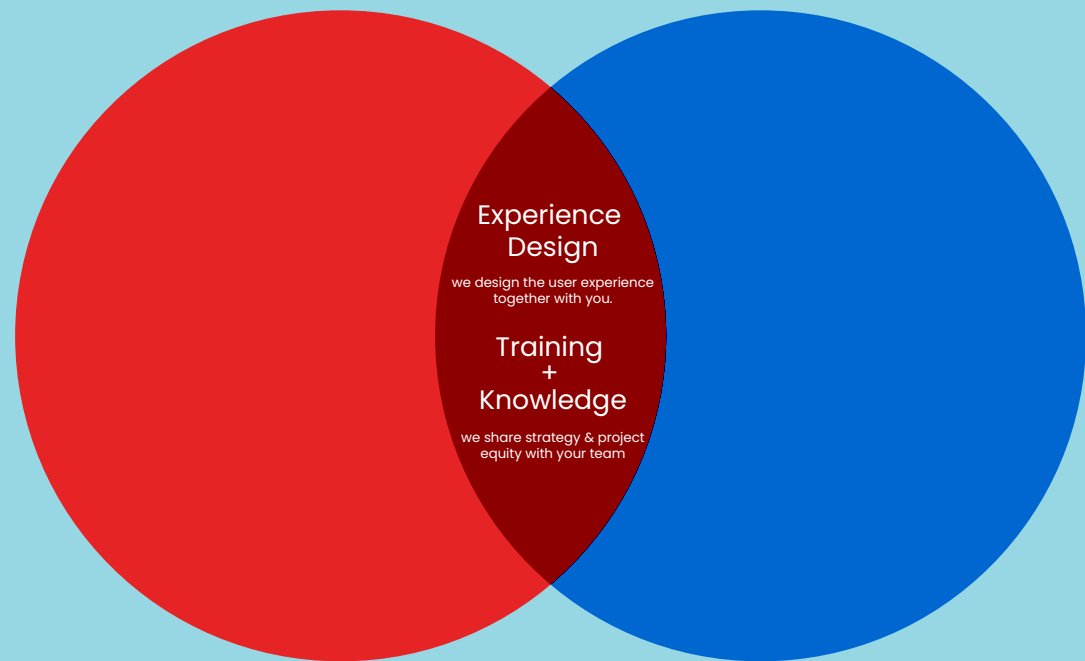

Step by step

We are good dancers, waltzing through every project with a well-choreographed routine that includes strategy, creativity, development, system integration, and maintenance.

We create results step by step, and since everything is managed internally, we can make decisions that leverage different skills. This is why we know how to rock the floor.

Experience is better when shared

Wow, it's beautiful! And it works too!

1. Vision

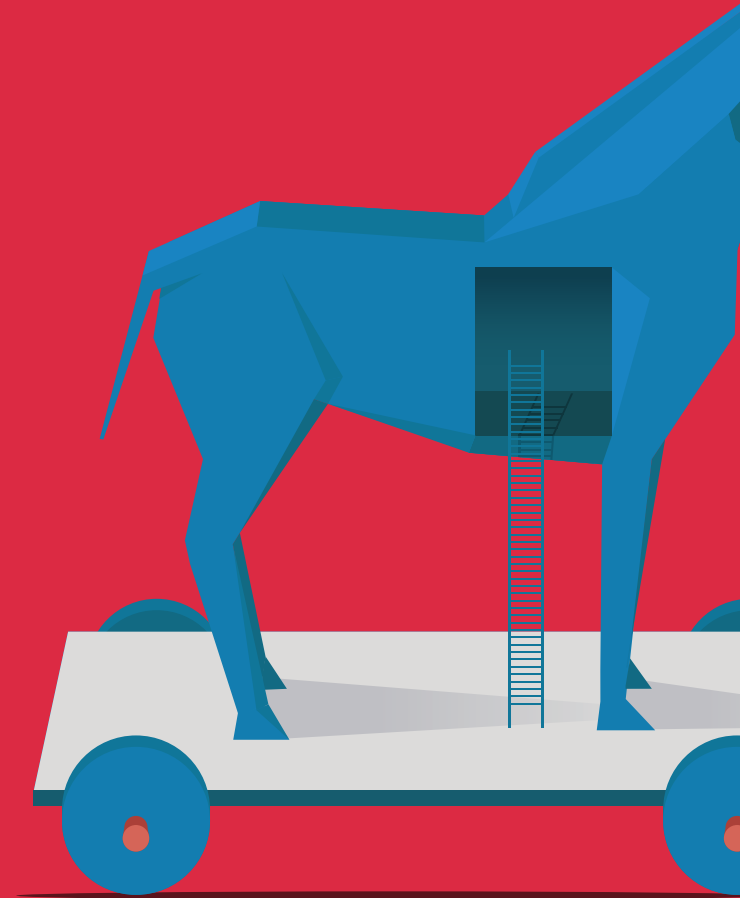

We look around. Before acting, we analyze the scenario.

2. Effectiveness

It looks good. It's reliable. And we can measure it.

3. Guarantee

Every step of the project has to be the best one.
